

Hockey shooting pads

Hockey shooting pads provide a perfect platform for hockey shooting, passing, stickhandling, and scoring. The pad is made of HDPE (High-density polyethylene) with handle and beveled edges. With the shooting pad, no longer worry about damaging your sticks while training on concrete, asphalt or other hard ground. The beveled edges make sure you can get the punks easily. Also, each pad has handle for easy carrying.

Features

- Customized size available
- Outdoor or indoor shooting, passing, stickhandling, scoring
- UV Protected for outdoor use
- Low friction coefficient, high wear resistance, high impact resistant
- Beveled edges design
- Easy to handle

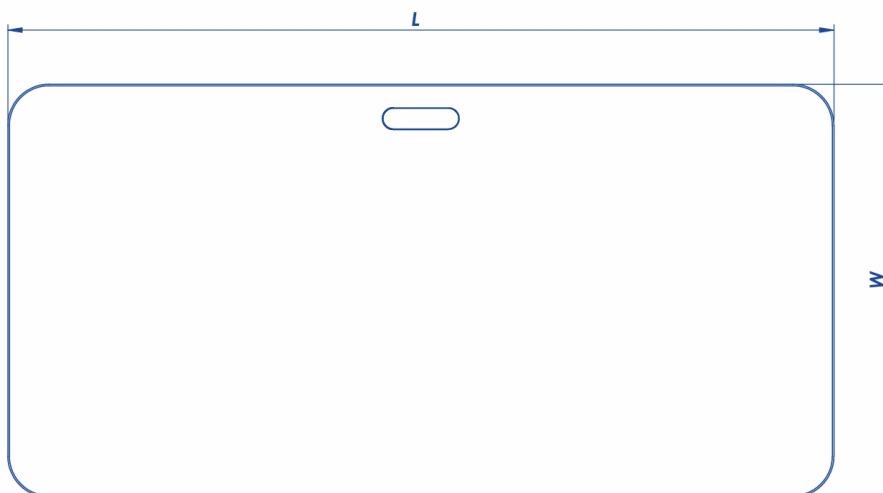

Size table

Application	Popular Dimensions W*L(in)	Popular Dimensions W*L(mm)	Thickness Inch (mm)
