

## Concrete Protection Liners

**Concrete Protection Liners (CPL)** are made of HDPE materials which provide excellent protection of concrete structures from abrasion and corrosion. This product offers a complete, premium-quality selection of plastic liners that provide perfect protection for concrete. The main focus here is on protecting concrete against environmental influences and aggressive or abrasive media, in order to improve the service life of concrete works. The specially designed Ultra Grip V anchoring studs, which are embedded in the concrete, provide a superior mechanical connection between the concrete and the liner.

## Features

- Effective protection for concrete is ensured by the combination of the benefits of special thermoplastic liners (flexible, ductile, no corrosion) with those of concrete (high strength, high stiffness).
- The concrete is effectively protected thus prolonging the building' s service life.
- Absolute mechanical anchoring and bridging of cracks in concrete, as well as excellent shear and impact strength and the durability of the liners for concrete protection are just a few of the many benefits.

## Size table

Type A(H: Stud height; D:Thickness)							
Items	A 1.5	A 2	A 2.5	A 3	A 4	A 5	A 6
H (mm)	13	13	13	13	13	13	13
D (mm)	1.5	2	2.5	3	4	5	6
Type B(H: Stud height; D:Thickness)							
Items		B 2	B 2.5	B 3	B 4	B 5	B 6
H (mm)		19	19	19	19	19	19
D (mm)		2	2.5	3	4	5	6

**Width:2000mm,1960mm with stud**  
**Length: Can be customized**  
**Color: White,black,yellow,blue,red,grey or customized**  
**Package: Roll/Sheet**
